

SAFETY ADMISSION STANDARDS

Perth & District Indoor Pool

Admission standards apply child to parent/guardian ratios as a means of increasing direct supervision of young children, particularly those that are non-swimmers. The additional level of supervision assists lifeguards in maintaining adequate surveillance of the whereabouts and activities of young bathers while inside the pool. The standards apply to pool swim sessions only - they do not apply to swimming lessons.

High Risk Personnel- Must be in a ratio of 1:1. High Risk Personnel are defined as those who have a condition of illness that may put them at risk in an aquatic environment (eg. frequent seizures, fainting conditions etc). and those who are unable to control behaviour or impulses and require direct supervision. The lifeguard reserves the right to ask for the High Risk Personnel to have additional support in the water.

Swim Tests- Must be completed each swim (for ages 8-9 years old and/or higher if the lifeguard deems so). In order to pass the swim test, the swimmer must swim 2 widths of the pool on your front without stopping and tread water in one spot for 1 minute. If the swimmer cannot pass the swim test they are considered to be a non-swimmer. The lifeguard reserves the right to ask anyone to take a swim test.
